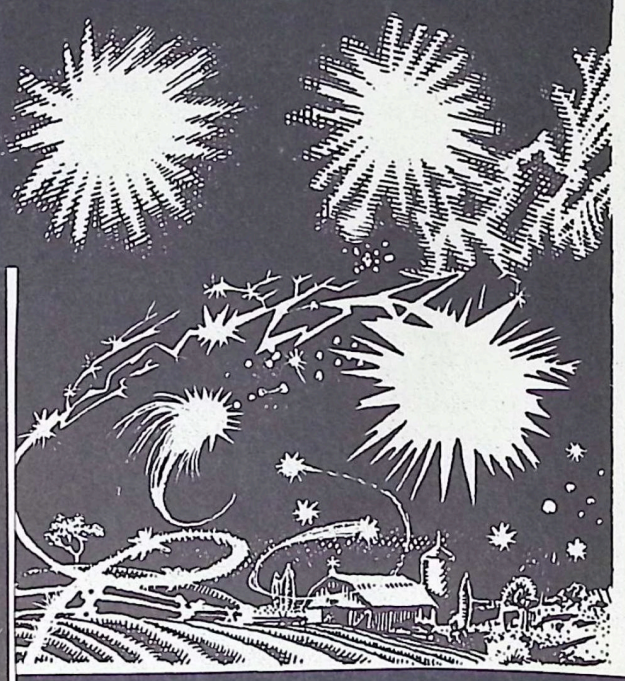
It is tempting for physicists to argue that since ball lightning can't be explained, it probably doesn't exist!



Our early warning systems are set up to monitor the things we know about. Those whose existence we do not suspect are perceived only with great difficulty.

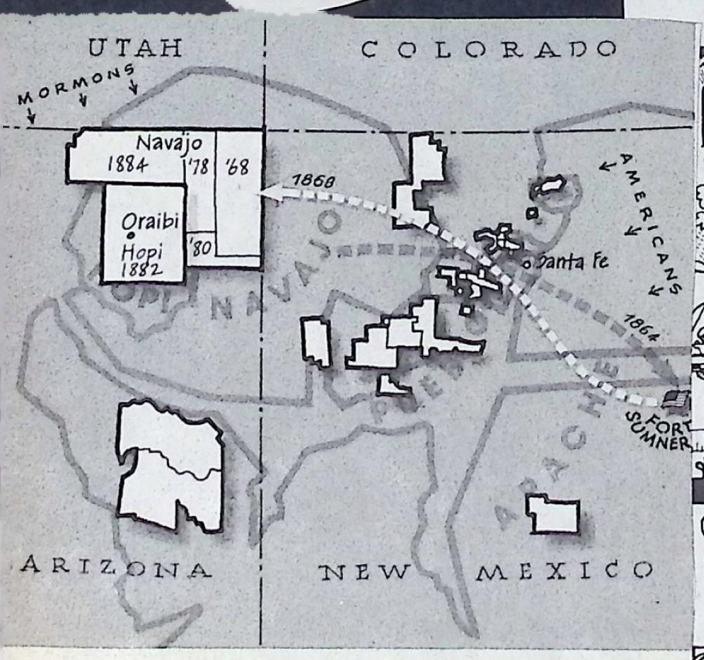
MIGRATIONS #32 Win '81



INVASIONS #32 Win '81

1. Trace the water you drink from precipitation to tap.
2. How many days till the moon is full? (Slack of two days allowed.)
3. What soil series are you standing on?
4. What was the total rainfall in your area last year (July-June)? (Slack: 1" for every 20".)
5. When was the last time a fire burned your area?
6. What were the primary subsistence techniques of the culture that lived in your area before you?
7. Name five native edible plants in your region and their season(s) of availability.
8. From what direction do winter storms generally come in your region?
9. Where does your garbage go?
10. How long is the growing season where you live?
11. On what day of the year are the shadows the shortest where you live?
12. When do the deer rut in your region, and when are the young born?
13. Name five grasses in your area. Are any of them native?
14. Name five resident and five migratory birds in your area.
15. What is the land use history of where you live?
16. What primary geological event/process influenced the land form where you live? (Bonus special: what's the evidence?)
17. What species have become extinct in your area?
18. What are the major plant associations in your region?
19. From where you're reading this, point north.
20. What spring wildflower is consistently among the first to bloom where you live?

SCORING

0-3	You have your head up your ass.
4-7	It's hard to be in two places at once when you're not anywhere at all.
8-12	A fairly firm grasp of the obvious.
13-16	You're paying attention.
17-19	You know where you're at.
20	You not only know where you're at, you know where it's at.
